

Scientist/Sr. Scientist, Bioassay

The Position:

This position will focus on the implementation of biological assays to support the development and characterization of Bolt's Boltbody™ Immune-stimulating Antibody Conjugates (ISAC). The successful candidate will develop, qualify and implement potency assays to support process development activities, drug substance/product release/stability and regulatory filings.

About You:

You have a BS (with at least 8 years of experience) or MS (with at least 5 years of experience) or PhD (with at least 3 years of experience) in Immunology, Molecular Biology, Cancer Biology, Biochemistry, Bioengineering or related discipline. You have experience developing in vitro or ex vivo cell-based bioassays and immunoassays, implement, and transfer potency assays to CMO (cytotoxicity, binding, Fc effector function, and immunological assays) to support early- and late-phase product and process development. You have experience with drafting of potency assay method standard operating procedures (SOPs), technical reports and data summaries. You will organize and present data at group and department meetings and represent Potency Assays group on project and departmental initiative teams. You have excellent oral and written communication skills. You must be driven, high-motivated and be able to work in a fast-paced, matrixed environment. You have strong interpersonal skills and the ability to work in a multi-disciplinary team environment. You are creative, independent, well-organized and solution-oriented.

Who We Are:

Bolt Biotherapeutics, based in the San Francisco Bay Area, is a private clinical-stage biotechnology company developing Boltbody™ Immune-stimulating Antibody Conjugates (ISACs), a new class of immuno-oncology therapeutics that have eliminated tumors following systemic administration in preclinical studies while also developing immunological memory, which may lead to more durable clinical responses for patients. This is a unique opportunity to join and build, with like-minded colleagues, a company that will transform the lives of individuals with cancers.

We are an Equal Opportunity Employer offering a competitive salary and benefits package. Applicants should be legally entitled to work for any employer in the US. Note to Employment Agencies: Please do not forward any agency resumes. The company will not be responsible for any fees related to resumes that are unsolicited.
